7	FILL TANK 90% FULL <i>Fill the spray tank to nearly full.</i>	90%
8	ADD GLYPHOSATE PRODUCTS <i>Add any glyphosate based products.</i>	+ Credit® Xtreme
9	ADD ADJUVANTS <i>Add any adjuvants and fill the tank.</i>	100%

Grow a better tomorrow.

- STEP-BY-STEP CLEANOUT GUIDE - SPRAYER TANK CLEANOUT

For use after applications of Panther® SC, Panther® D, or Tuscany® herbicides.

The entire spray system (tank, filters, hoses, booms, screens and nozzles) must be cleaned after each day's application of Panther® or Tuscany® brands and before spraying over-the-top of any crop. Follow the steps below, and always use Valent Tank Cleaner at a concentration of 1 gallon per 100 gallons of water.

Spray equipment, including all tanks, hoses, booms, screens and nozzles, must be thoroughly cleaned before it is used to apply post-emergence pesticides. Equipment with Panther SC, Panther D, or Tuscany residue remaining in the system may result in crop injury to the subsequently treated crop.

This procedure and Valent Tank Cleaner will clean out your tank, hoses, nozzles and screens if followed as described. Valent Tank Cleaner is available from your Valent supplier.
